

Plum Creek Super Refined MDF 2

Distributed by:

Ohio's #1 source for
Specialty Panel
Products.

When it comes to value, what really counts is not how much the MDF costs – but how much it costs to use it. Not all MDF panels are alike, and may differ by wood species, fiber size, binders, density and consistency. *All of these factors have a significant impact on key elements of your processing costs including:*

Cutting tool life, Labor, Defect Rates
Machine center throughput speed and amp load
Machined profile quality as it relates to the need for sanding, filling and other steps prior to finishing
Amount / thickness of coating or laminating material required for adequate coverage

BILLING WILL BE ON THE NET FULL SIZE OF PANEL

Thickness	Description	Width	Weight LBS/MSF	Pieces/ unit	Stocked Panels	Price/m	NAF/m
