ULTRA LIGHT WEIGHT ITALIAN POPLAR

1. 50% lighter than mdf and 30% lighter than domestic hardwood plywood panels.
2. Available in 9mm - 25mm thickness 8'x10'
3. Excellent for staining and painting

GREAT FOR MARINE, MOBLE, FURNITURE, DISPLAY AND EXHIBITS

ULTRA LIGHT WEIGHT MDF

1. Smooth , flawless surface ideal for millwork and lamination applications where finished product weight is a concern. **UP TO 33% LIGHTER THAN TYPICAL MDF**
2. Extremely light weight, lower tool wear, reduced finished good transportation cost.
3. C.A.R.B Certified

ULTRA CORE LIGHT WEIGHT HDF

1. 10% lighter than standard mdf
2. Flawless HDF faces and backs
3. Great PAINTABILITY
4. Composed inner plys with exterior glue
5. YOUR choice for painting, laminating, structure or substrates.
6. NAUF and C.A.R.B II compliant

ULTRA LIGHT WEIGHT FIBERBOARD

Calendered clay coated fibercore

ALL PURPOSE, DURABLE AND LIGHT WEIGHT FIBERBOARD SUBSTRATE PERFECTLY SUITED FOR A NUMBER OF NAUF MANUFACTURING NEEDS.

ENDLESS APPLICATIONS:
 TACKBOARDS, BULLETIN BOARDS, FURNITURE, OFFICE PANELS, PACKAGING, PARTITIONS, WHITEBOARD, SOUND DEADENING. CAN BE LAMINATED OR PAINTED

ULTRA LIGHT HOLLOW CORE PANEL

RAM CORE 		SABERTAK 	
PUMAPLY 		PANTHER PLY 	

Advantages of the light weight solution

1. Substitute solid mass with a variety of lightweight core materials
2. Lower freight costs than traditional products
3. Less effort in handling/assembling through every stage of the install process
4. Use of lower weight rating hardware- this often drops the hardware specification from a high cost/low volume bracket to a low cost/high volume bracket which can have tremendous cost reduction impact
5. Reduction of damaged goods- heavy laminated components damage very easily because of their weight and fragility of finish surfaces- take away the weight.....take away the problem!
6. Less installation staff required as components weigh less- an example of this is a feature wall installation behind a check counter in a retail outlet. Prior installations using solid material components necessitated four installation staff per install crew. With the introduction of hollow core components this install crew was reduced to two.

SUCCESS STORIES

- "WE SAVED 90 LBS PER MOBLE DISPLAY FOR ONE OF OUR MAJOR RETAILERS USING THE ITALIAN POPLAR"
- "ULTRACORE HDF PLYWOOD HAS OFFERED GREAT SAVINGS IN PREP AND SET UP COST AT OUR PAINT LINE"
- LARGE EXHIBIT DISPLAY MFG SAVED BIG ON FREIGHT AND DRAYAGE CHARGES OVER TIME, "LIGHT WEIGHT PANELS, A PRODUCT THAT KEEPS PAYING DIVIDENDS, OVER AND OVER"
- "WE ARE ABLE TO INSTALL LARGER FINISHED PARTS WITH LESS MAN POWER AND FEWER SEAMS"
